SIGNO AS

Atera has launched its SIGNO family of roof bars. The SIGNO AS bars are beautifully made, stylish, pre-assembled and ready to fit. You literally only need to take them out of their box and tighten them onto the roof using the coded tensioner / key; there are no additional adjustments to make.

SIGNO ASR

The SIGNO ASR bars for longitudinal roof rails present a particularly low profile - only 40mm from the centre of the rail to the top of the roof bar; they suit roof rails from 15 - 55mm diameter (i.e. they can be adjusted for particularly wide roof rails.) Longer bars are available should you change to a wider or narrower vehicle.

SIGNO FEATURES

- completely pre-assembled
 - supplied ready to fit
 - fits perfectly
 - anti theft-protection by the Atera coded key.*
 - integrated locks for extra security
 - extreme loading width
 - integral design
 - can be used with other Atera & universal accessories
- effortless mounting: take out, put on, secure – you're ready to go!

* The unique Atera key is used to mount the bars (no tools needed) and lock the bars in place.
